

# The BlueStone ConferenceCall 220

*Conference Call Management and Scheduling.*

## Connect your team anytime, anywhere

Conference calls have become a way of life for many companies, fulfilling the role of bringing together people from disparate locations in an increasingly global world. However to many, the cost and effort of organizing conference calls could be much improved, and this is precisely where the BlueStone ConferenceCall 220 is aimed.

ConferenceCall 220 is designed to allow you to customize how your conferencing facilities are sized, and provide cost effective growth. By adding additional conference resources, and with the

ConferenceCall 220 Manager software, setting up a conference is simple. The notifications and calendar integrations with Microsoft Outlook are automatic. It has never been easier to own your conferencing resources, and to use the ConferenceCall 220 as much as you like.

## East to attend

Participants can easily join conferences by simply dialing an extension and selecting the conference of their choice or by having an automated invitation connect them at the meeting start time. With ConferenceCall 220 Conference Manager, say goodbye to complicated access numbers and codes.

## Log, Monitor and Record

ConferenceCall 220 Conference Manager works seamlessly with all other ConferenceCall 220 features. You can view, manage and record conference calls in the ConferenceCall 220 Call Monitor, as well as, using the ConferenceCall 220 Call Log to keep track of who was in a conference for how long, and more.

Selected Features of ConferenceCall 220 Conference Manager
