

Bluestone Web Applications

MyPhone

URL: <https://myphone.btcfg.com>

This app is available to all users of the phone system. It is designed to allow you to control all of the personal aspects of your account, namely:

- Call Detail Records - (with the ability to play back recording)
- Configuring Find Me Follow Me or FMFM.
- Contacts to be loaded into either Polycom or Yealink phones.
- Other account data such as passwords and preferences.

The login page and an example session are shown in the illustration below. There is extensive help within the application, found not surprisingly under the "Help" tab.

MyGui

URL: <https://mygui.btcfg.com>

This application is for administrators only. If you try to log-in as a regular user you will be redirected to the MyPhone app.

The application provides for configuration of all aspects of the phone system.

Each tab has a lifebelt in the upper right hand corner that contains extensive help on that page.
